## Where does generative AI fit?

#### Artificial intelligence (AI)

Any technique that allows computers to mimic human intelligence using logic, if-then statements, and machine learning

#### Machine learning (ML)

A subset of AI that uses machines to search for patterns in data to build logic models automatically

#### Deep learning (DL)

A subset of ML composed of deeply multi-layered neural networks that perform tasks like speech and image recognition

Generative Al

Powered by large models that are pretrained on vast corpora of data and commonly referred to as foundation models (FMs)

During a physical, your doctor will examine your ankle, foot and lower leg. The doctor will touch the skin around the injury to check for points of tenderness and move your foot to check the range of motion and to understand what positions cause discomfort or pain.

If the injury is severe, your doctor may recommend one or more of the following imaging scans to rule out a broken bone or to evaluate in more detail the extent of ligament damage:

Tips for prompting

### Tips for prompting

- Be detailed and specific
- Guide the model to think through its answer
- Experiment and iterate

### Be detailed and specific

- Give sufficient context for LLM to complete the task
- Describe the desired task in detail

Help me write an email asking to be assigned to the legal documents project.

I'm applying for a job on the legal documents project, which will check legal documents using LLMs. I have ample experience prompting LLMs to generate accurate text in a professional tone.

Write a paragraph of text explaining why my background makes me a strong candidate to this project and advocate for my candidacy.

### Guide the model to think through its answer

Brainstorm 5 names for a new cat toy.

Step 1: Come up with 5 fun, joyful words that relate to cats.

Step 2: For each word, come up with a rhyming name for a toy.

Step 3: For each toy name, add a fun, relevant emoji.

### Guide the model to think through its answer

### Model response:

#### Step 1:

5 fun, joyful words that relate to cats:

Purr Whisker Feline Pounce Meow

### Step 2:

Rhyming names for a toy based on those words:

Purr-Twirl Whisker-Whisper Feline-Beeline Pounce-Bounce Meow-Wow

### Step 3:

Add a fun, relevant emoji for each toy name:

Purr-Twirl **6**Whisker-Whisper **8**Feline-Beeline **8**Pounce-Bounce **8**Meow-Wow **8**

### Iteratively improving your prompt

#### Prompting process

- Be clear and specific in prompt
- Think about why result isn't giving desired output
- Refine your prompt
- Repeat

Tip: Don't overthink the initial prompt. Just try something quickly and improve it over time!

Caveats: Be careful with

- (i) confidential information
- (ii) whether you trust the LLM output
